

## EPA Metadata Editor (EME)

Download the EME Free!  
<https://edg.epa.gov/EME/>

### New in EME

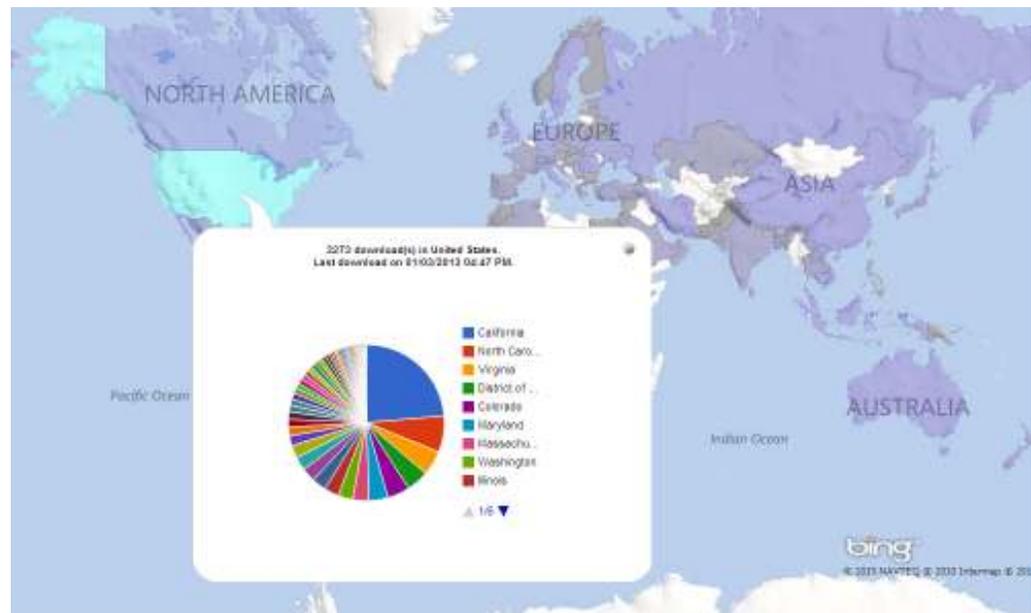

The EME provides users with the ability to edit and synchronize FGDC CSDGM metadata in ArcGIS Version 10!

The EME runs as an ArcGIS Extension and as a standalone desktop tool.

Check the [EME website](#) for additional materials.

For More Information

The EPA Metadata Editor (or EME) is a software tool that aids the practical documentation of geospatial datasets. The simple EME application allows GIS professionals to create, edit and validate their metadata records. EME is used extensively worldwide.

## Key Features

- Standalone desktop tool or ArcGIS extension
- Simple, user-friendly interface
- Automated drop-downs and buttons
- Clear and intuitive metadata requirements
- Integrated and customizable help system
- Configurable EPA Synchronizer
- Validates to EPA and Federal (FGDC) standards
