Mr. Kevin Uden
Assistant Superintendent
Parker Unified School District #27
P. O. Box 1089
Parker, AZ 85344

Dear Mr. Uden:

The Environmental Protection Agency has received the tank removal report dated July 16, 1998 prepared by IHI Environmental for the removal of three underground storage tanks (USTs) at the bus barn of the Parker Unified School District #27, located in Parker, Arizona, on land of the Colorado River Tribes.

Analytical results from samples taken below the tank bottoms indicate no soil contamination above tribal established action levels. Approximately ten cubic yards of soil, discolored by hydrocarbon stains, has been separated and placed on plastic liners for land farming.

The information submitted has assisted EPA in assessing the status of this site, where three USTs were removed on June 2, 1998. This site does not appear to pose a current threat to human health and the environment. EPA is not requiring further action at this time.

Please call Walt Guggenheimer at (415) 744-2094, if you have questions or need more information.

Sincerely,

Lester Kaufman, Chief
Underground Storage Tanks Program Office
