Department of Development Services
3 West Third Street- Main Street Plaza
Yuma, AZ 85364

Dear Ms. Haldane:

The U. S. Environmental Protection Agency (EPA) has reviewed the August 1997 groundwater monitoring report prepared by Fluor Daniel GTI for the Cocopah Maintenance Facility located in Somerton, AZ on land of the Cocopah Tribe.

The information submitted has assisted the EPA in assessing the status of this site, where one underground storage tank (UST) was removed in April 1992. Our records indicate there are no other USTs in or out of service at this site.

This former leaking UST site does not appear to currently pose a threat to human health and the environment. EPA is not requiring further action at this time with respect to the Cocopah site.

If new USTs are installed at the site, Tank Notification Form #7530-1 must be completed and sent to this office within 30 days after start-up of the new UST system.

Please call Walt Guggenheimer at (415) 744-2094 if you have questions or need more information.

Sincerely,

Lester Kaufman, Chief
Underground Storage Tanks Program Office
