Mr. Dewayne Nolin  
Sector Environmental Compliance Manager  
Federal Aviation Administration  
2641 E. Buckeye Road  
Phoenix, Arizona 85034

Dear Mr. Nolin:

The Environmental Protection Agency (EPA) has received the Remedial Site Investigation Report prepared by Advanced Sciences, Inc. (ASI) dated January 1993. This report contains analytical results of soil sampling conducted after the removal of two underground storage tanks (UST) from the Federal Aviation Administration (FAA) Very High Frequency Omnidirectional Radar (VOR) facility in Peach Springs, Arizona, located on the Hualapai Indian Reservation.

Analysis of soil samples collected beneath the two USTs during their removal on July 7, 1992, detected elevated levels of total petroleum hydrocarbons (TPH). On September 23, 1992, about ten cubic yards of contaminated soil was removed from the UST excavation.

Analysis of soil samples collected on September 23, 1992, from the sidewalls and bottom of the UST excavation after the soil removal detected recoverable TPHs at concentrations below levels of concern.

EPA has also received your submittal of February 3, 1993, consisting of an updated UST Notification form and two Certificates of Destruction.

The information submitted above has assisted EPA in assessing the status of this site. This site does not appear to currently pose a threat to human health and the environment. EPA is not requiring any further action at this time.
