Mr. Roland Mora  
Senior Project Manager  
Chevron Products Company  
P. O. Box 2292  
La Brea, CA 92822

Dear Mr. Mora:

This correspondence refers to the October 4, 2001 letter from Holguin, Fahan & Associates, Inc. (HFA) regarding the closure of Chevron Station #9-1513, which was located at 8802 East McDowell Road in Scottsdale, Arizona, on land of the Salt River Pima-Maricopa Indian Community.

Although a memo to our site file indicates that a "no further action" (NFA) letter for this station was mailed on February 13, 1993 we were unable to locate the original signed letter. We apologize that you never received the original NFA letter and request that you use this letter for your files.

The information submitted by HFA has assisted EPA in assessing the status of this site, where four underground storage tanks (USTs) were removed on April 20, 1990. This site does not appear to pose a current threat to human health and the environment. Therefore, EPA is not requiring further action at this time.

If new USTs are installed at the site, Tank Notification Form #7530-1 must be completed and sent to this office within 30 days after startup of the new UST system. A copy of this form is enclosed for your information. Please call Walt Guggenheimer at (415) 744-2094, if you have questions or need more information.

Sincerely,

Lester Kaufman, Manager  
Underground Storage Tanks Program Office

Mr. Roland Mora  
Senior Project Manager  
Chevron Products Co.  
P. O. Box 2292  
La Brea, CA 92822

Dear Mr. Mora:

This correspondence refers to the October 4, 2001 letter from Holguin, Fahan & Associates, Inc. (HFA) regarding the closure of Chevron Station #9-1513, which was located at 8802 East McDowell Road in Scottsdale, Arizona, on land of the Salt River Pima-Maricopa Indian Community.

The information submitted by HFA has assisted EPA in assessing the status of this site, where four underground storage tanks (USTs) were removed on April 20, 1990. This site does not appear to pose a current threat to human health and the environment. Therefore, EPA is not requiring further action at this time.

HFA submitted a copy of the above-mentioned assessment report with its October 4, 2001 letter. Our review of this document and the analytical results for soil samples collected at the UST site indicates no hydrocarbon concentrations above appropriate EPA, Region IX or tribal soil cleanup levels.

The information submitted has assisted EPA in assessing the status of this site, where four underground storage tanks (USTs) were removed on April 20, 1990. This site does not appear to pose a current threat to human health and the environment. Therefore, EPA is not requiring further action at this time.

Sincerely,

Lester Kaufman, Manager  
Underground Storage Tanks Program Office
